

## **Ability Enterprise Co., LTD.**

### **Green Product Policy**

1. Based on the GP Green Product Hazardous Substance-Free Management System, we strive to maintain and improve the environmental quality of GP products.
2. Comply with laws, regulations, agreements and customer GP requirements related to GP product environmental quality, and ensure that the parts and auxiliary materials used in the products, from design, raw material procurement, production to shipment, are prohibited from using Class I environmental management substances specified by Ability and customers.
3. Confirm GP product quality management system through GP internal audit and supplier audit, and strive to maintain and improve the management system.
4. Strengthen the awareness of product quality management among GP organization members and related colleagues, train talents related to product quality assurance, and actively participate in GP product protection activities.
5. Communicate the customer' s GP regulations to suppliers and require them to comply with them.
